

Illustrated Guide to Home Biology Experiments

Table of Contents (as of 28 January 2012)

Table of Contents

A. Preface

B. Introduction (in progress)

C. Equipping a Home Biology Laboratory

D. Lab Safety

Lab Session Section

Group I – Mastering Microscope Skills

Lab Session I-1: Using a Microscope

Procedure I-1-1: A Microscope Tour

Controlling and focusing the light

Focusing the microscope

Determining field of view and measuring specimens

Positioning and observing a slide

Sidebar: Build a Dark-field Apparatus from Pocket Change

Review Questions

Lab Session I-2: Mounting Specimens

Procedure I-2-1: Making Wet Mounts

Mounting a hair specimen

Comparing temporary mounting fluids

Procedure I-2-2: Making Smear Mounts

Procedure I-2-3: Making Hanging Drop Mounts

Procedure I-2-4: Making Sectional Mounts

Review Questions

Lab Session I-3: Staining

Procedure I-3-1: Simple Staining

Procedure I-3-2: Gram Staining

Review Questions

Group II – Building and Observing Microcosms

Lab Session II-1: Building Microcosms

Procedure II-1-1: Gathering materials

Procedure II-1-2: Building aquarium microcosms

Procedure II-1-3: Building Winogradsky column microcosms

Procedure II-1-4: Observing Winogradsky column microcosms

Review Questions

Lab Session II-2: Observing Succession in Aquarium Microcosms

Procedure II-2-1: Observe succession in microcosms

Review Questions

Lab Session II-3: Observing the Effects of Pollution in Microcosms

Procedure II-3-1: Build polluted microcosms

Procedure II-3-2: Observe succession in polluted microcosms

Review Questions

Group III – Chemistry of Life

Introduction

Lab Session III-1: Acids, Bases, and Buffers

Procedure III-1-1: Percentage and Molar Concentrations

Procedure III-1-2: Effect of Concentration on pH

Procedure III-1-3: pH of Household Materials

Procedure III-1-4: Buffers

Review Questions

Lab Session III-2: Carbohydrates and Lipids

Procedure III-2-1: Investigating Sugars

Procedure III-2-2: Investigating Starches

Procedure III-2-3: Investigating Lipids

Review Questions

Lab Session III-3: Proteins, Enzymes, and Vitamins

Procedure III-3-1: Investigating Proteins

Procedure III-3-2: Investigating Enzyme Catalysis

Procedure III-3-3: Assaying Vitamin C Concentration in Urine

Review Questions

Lab Session III-4: Coacervates

Procedure III-4-1: Prepare and observe a coacervate

Review Questions

Lab Session III-5: Extracting, Isolating, and Visualizing DNA

Procedure III-5-1: Extracting and Visualizing DNA

Review Questions

Lab Session III-6: Build a Gel Electrophoresis Apparatus

Procedure III-6-1: Making the gel casting container and comb

Procedure III-6-2: Assemble the apparatus

Lab Session III-7: Simulated DNA Gel Electrophoresis (in progress)

Group IV – Life Processes

Lab Session IV-1: Chlorophyll and Photosynthesis

Procedure IV-1-1: Observing Carbon Dioxide Uptake

Procedure IV-1-2: Determining the Effect of Light Intensity on Photosynthesis

Procedure IV-1-3: Chromatography of Plant Pigments and Locating Cellular Energy Reserves

Review Questions

Lab Session IV-2: Investigating Osmosis

Procedure IV-2-1: Observing osmosis in chicken eggs

Review Questions

Lab Session IV-3: Investigating Cell Division

Procedure IV-3-1: Observing Mitosis

Review Questions

Group V – Ecology

Lab Session V-1: Sampling Plant Populations in a Community

Procedure V-1-1: Choosing and preparing the survey area

Procedure V-1-2: Surveying the plant community

Procedure V-1-3: Performing a population count

Review Questions

Lab Session V-2: Observing the Effect of Rhizobia on Plant Growth

Procedure V-2-1: Grow lima beans with and without rhizobia

Review Questions

Lab Session V-3: Air Pollution Testing

Procedure V-3-1: Building particle traps

Procedure V-3-2: Positioning and exposing the particle traps

Procedure V-3-3: Counting and identifying particles

Review Questions

Lab Session V-4: Soil and Water Pollution Testing

Procedure V-4-1: Obtaining soil and water specimens

Procedure V-4-2: Testing the reagents

Procedure V-4-3: Making boron concentration comparison standards

Procedure V-4-4: Testing specimens for boron

Review Questions

Group VI – Genetics and Inheritance

Lab Session VI-1: Exploring Mendelian Genetics

Procedure VI-1-1: Testing subjects for the ability to taste PTC

Procedure VI-1-2: Charting inheritance of PTC-tasting ability

Review Questions

Group VII – Cells and Unicellular Organisms

Lab Session VII-1: Observing Specialized Eukaryotic Cells

Procedure VII-1-1: Observing onion epidermal and Elodea leaf cells

Procedure VII-1-2: Comparing and contrasting eukaryotic cells

Review Questions

Lab Session VII-2: Preparing Culturing Media

Procedure VII-2-1: Preparing normal saline and nutrient media

Review Questions

Lab Session VII-3: Culturing Bacteria

Procedure VII-3-1: Staining and observing the original culture

Procedure VII-3-2: Inoculating plates and tubes

Procedure VII-3-3: Producing pure cultures

Review Questions

Lab Session VII-4: Investigating Bacterial Antibiotic Sensitivity

Procedure VII-4-1: Testing antibiotic sensitivity

Procedure VII-4-2: Culturing an antibiotic-resistant bacteria strain

Procedure VII-4-3: Retesting sensitivity of the resistant strain

Review Questions

Group VIII – Protista

Lab Session VIII-1: Investigating Protista

Procedure VIII-1-1: Observing Spirogyrae

Procedure VIII-1-2: Observing Euglenae

Procedure VIII-1-3: Observing Amoebae

Procedure VIII-1-4: Observing Paramecia

Review Questions

Group IX – Fungi

Lab Session IX-1: Investigating Fungi

Procedure IX-1-1: Observing Zygomycota

Procedure IX-1-2: Observing Ascomycota

Procedure IX-1-3: Observing Basidiomycota

Review Questions

Group X – Plantae

Lab Session X-1: Investigating Simple Plants: Mosses and Ferns

Procedure X-1-1: Observing Moss Structures

Procedure X-1-2: Observing Fern Structures

Review Questions

Lab Session X-2: Investigating Seed Plants

Procedure X-2-1: Observing Germination of a Seed Plant

Procedure X-2-2: Observing Root Structures

Procedure X-2-3: Observing Stem Structures

Procedure X-2-4: Observing Leaf Structures

Procedure X-2-5: Observing Reproductive Structures

Review Questions

Group XI – Animalia

Lab Session XI-1: Investigating Porifera and Cnidaria

Procedure XI-1-1: Observing Porifera

Procedure XI-1-2: Observing Cnidaria

Review Questions

Lab Session XI-2: Investigating Platyhelminthes, Nematoda, and Annelida

Procedure XI-2-1: Observing Platyhelminthes (flatworms)

Procedure XI-2-2: Observing Nematoda (roundworms)

Procedure XI-2-3: Observing Annelida (segmented worms)

Review Questions

Lab Session XI-3: Investigating Arthropods

Procedure XI-3-1: Observing and Comparing Arthropod Structures

Procedure XI-3-2: Observing Insect Metamorphosis

Review Questions

Lab Session XI-4: Investigating Vertebrate Tissues

Procedure XI-4-1: Observing Epithelial Tissues

Procedure XI-4-2: Observing Connective Tissues

Procedure XI-4-3: Observing Muscle Tissues

Procedure XI-4-4: Observing Nerve Tissues

Review Questions
